Hinged door for positive working temperature mm 68

Door to fit on coldrooms with working temperature up to 0°C. It is composed of a monolithic buffer-type doorwing, insulated with injected polyurethan foam, and steel frame. The doorwing has an ergonomic handle (with or without key-lock) and on the inside a button with safety release.

The doorwing has a rubber gasket on its perimeter and on the lower floor side, standard it has a threshold to enable easy opening and closing. The hinges are with helical ramps.

The doorwing cladding can be either with stainless steel, non toxic painted or pvc coated steel sheet or glassfiber.
ALFA α+
DETAILS

FEATURES

L = L₁ + 100 mm
H = H₁ + 50 mm

OPTIONS

Increased thickness to 95 mm up to 1600x2500 (TN 95)
Partial front protection in stainless steel or goffred aluminium (sp.2 mm)

LEGEND

A Standard threshold coldroom without floor
1 Gasket on perimeter in epdm rubber
2 Gasket on floor in epdm rubber
3 Internal push handle
4 Thermal interruption
5 Supporting frame of pvc, painted st. sheet or s/s
6 Hinges
7 External resin handle
8 Doorblade in expanded polyurethan
9 Wall panel in expanded polyurethan

The company reserves the right to introduce changes without prior notice.
**GENERAL**

- **Model:** Cold room insulated hinged door
- **Door type:** see door schedule with relevant drawing, the wing with its frame is outside the panel
- **Application:** suitable for chiller, cold rooms up to -5° centigrade
- **Size:** door from cm 70x175 up to 130x200
- **Thickness of the blade:** 68/92 mm

**MAIN CHARACTERISTICS**

- Frame and counter frame in pvc
- Suitable for all types of cold storages units, simple, functional, efficient for thermal ranges up to -35°C (-5°C to +30°C)
- Thickness: 68, 92 mm (blade)
- Colour (STD) white RAL9010 or similar
- Pre-painted of plastified with 25 micron suited for food process purposes
- Insulated with rigid polyurethane foam 100% CFC free
- Density about 40 kg/m³ (±5 kg/m³)
- Lambda value = 0,0225 W/mK thermal conductivity
- KVALUE (DIMENSIONS: clear width max. 3000 – clear height max. 3500 – other sizes on request)

**MANUFACTURER**

Coldtech s.r.l.

Web: www.coldtech.tech

Email: coldtech@coldtech.it

PH: +39 011 9370518

**WARRANTIES – MANUFACTURER/SUPPLIER/INSTALLER**

- 3 years for friendly utilization
- Hardware: 2 years with friendly utilization

**REQUIREMENTS**

Installer has to be experienced and to follow installation manual provided with the door

**MATERIAL**

**Door leaf:**

- Monolithic buffer-type door wing of which:
  - Door blade:
    - Edge Anodized aluminium profile (STD) or in stainless steel profile AISI 304 2B, thickness 0,15 mm
  - Insulation:
    - PUR Rigid polyurethane foam
    - Rigid polyurethane foam CFC free, density about 40 kg/m³ (±5kg/m²), Lambda value = 0,0225 W/mK
  - Covering:
    - STD Hot dipped galvanized (Sendzimir) pre-painted PVC (silicone polyester) coated or plastified with 25 micron suite for food processing film thickness 0,6mm, humidity resistance (100% relative humidity at 38°C) 1000 h. Anticorrosion class III OR
    - S.STEEL Stainless steel AISI 304 thickness 0,8 mm, anticorrosion, circular depolishing (flowered). Axial smoothing finish OR
    - FIBER GLASS any colour RAL, thickness 2,5 mm
  - Gasket:
    - Double execution (lined) neoprene black rubber gasket on three sides and one side on the floor, with double density sold, weight 1.180 g/cm², hardness = Shore A-70, Elongation at break 250% min., tearing resistance 30 KN/m min. operating temperature -35 °C./110°C. At the underside fitted with rubber sweeper gasket.
Hinged door for positive temperature application

> **Hardware:**

Handles: in nylon polyamide with 30% fiberglass, food safe proof with outside lever

Actionning inside mechanism linked to the frame

Thermal bridge interruption between outside mechanisms

Different colour and personalization with client logo

Hinges: 2 models with ramp of which:

1) For door up to 80 kg weight (2 hinges for wing)
2) For door up to 150 kg weight (3 hinges for door) vertically adjustable

> **Optional:**

Porthole in triple glass: round 35 cm with gasket or rectangular 40x60 cm with rounded corners

**Door frame:**

> **Frame:**

Standard in polyvinyl chloride thickness 3mm

Size: 130x47 / 130x65x47 / 140

OPTION PROTECTION: 1) standard Hot dipped galvanized (Sendzimir) pre-painted PVC (silicone polyster) coated or plastified with 25 micron suite for food processing film thickness 0,6 mm, humidity resistance (100% relative humidity at 38°C.) 1000 h. Anticorrosion class III.

3) Stainless steel Stainless steel AISI 304 thickness 0,8 mm, anticorrosion, circular depolishing (flowered). Axial smoothing finish

> **Side frame:**

For modular PVC covered by the same door-leaf covering (pre-painted, plastified or Stainless Steel ) size 100/20/40 mm

> **Counter frame:**

in PVC, from anodized aluminium or from stainless steel

> **Threshold**

S/1 for the room with step

S/2 floor level with steel angle to fix the jambs

S/3 floor level

S/4 heated floor level

S/5 Special threshold

**EXECUTION**

**CONDITIONS:**

Delivery, storage and handling: take delivery of material and accessories undercover on flat level surface of floor.

Remove all the package only you start the installation of the doors

Keep dry and avoid to expose the doors, especially those in ss, at the sun

**MANUFACTURER’S REQUIREMENT FOR INSTALLATION**

Installation should be done in accordance with best practice health and safety procedures.

Install and commissioning to required operation, in according with Coldtech installation requirement, manual and drawings.
